

Saasu POS. Your Next Generation Point of Sale.

If you love Saasu, you'll love Saasu POS.

Never miss a sale.

Saasu POS seamlessly works both **online and offline**. Your sales are pushed through to Saasu as they are finalized or as soon as an internet connection is available.

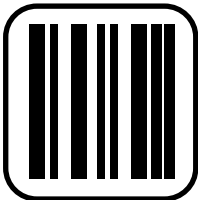

Love the system designed for you.

Saasu POS was designed for ease of use:

- ✓ Barcode reading for error-free data input
- ✓ Search by name/SKU with automatic filtering as you type
- ✓ Visual highlights of special products & offers
- ✓ One-key short cuts for common actions
- ✓ Large font for all screen items
- ✓ Colour coded operations (Sales vs. Returns)

Simple product management.

Scan and Save. Saasu POS makes product management easy with a simple bar-coding procedure for adding new products. Your products and stock are automatically synchronised with Saasu.

Boost sales with discounts & offers.

Saasu POS supports a wide range of discount types and special offers including discounts on multiple products and 'Buy One Get One Free' offers. Customise your offers with time frames, quantity restrictions, and coupon codes. Great visual cues highlight relevant offers as products are entered to help your staff promote the offers to your customers.

User management made easy.

With Saasu POS, you can create and **manage users** and permissions with ease. You can track important stats, such as sales per user and the 'End of Day' procedure provided makes closing the cashier at the end of the day or on a shift change a breeze.

Peace of mind.

- ✓ All data is backed up on our secure servers
- ✓ All sales are synchronised and saved in Saasu
- ✓ All products, users and offers are saved in Saasu POS
